PREFACE.

The observations contained in Volume IX, Part II, were made and reduced under the immediate supervision of Prof. W. S. Eichelberger, United States Navy. Those who participated in the work of observing and those who were engaged to a large extent upon the reductions are mentioned in the introduction to Volume IX, Part I.

After the preparation of the printer's copy was finished the volume was referred to the executive committee of the council for approval. The first type proof has been read from the original records. All proofs beyond the first have been read only to insure insertion of the corrections desired, except that in the plate proof the final results have been read entire.

J. A. HOOGEWERFF,
Captain, U. S. N., Superintendent.

OCTOBER, 1915.

OBSERVATIONS

MADE WITH THE

NINE-INCH TRANSIT CIRCLE,

1903-1908,

UNDER THE DIRECTION OF

W. S. EICHELBERGER.

Explanation of the Printed Observations and Reductions.......... B vi
OBSERVATIONS AND REDUCTIONS.......... B 1

INTRODUCTION.

From September 3, 1903, to April 11, 1911, the 9-inch transit circle was devoted to the observation of the stars contained in GILL's Zodiacal Catalogue of 2,798 Stars,[1] in HEDRICK's Catalogue of Zodiacal Stars,[2] and in NEWCOMB's Suggested List of Fundamental Stars,[3] and to the observation of the Sun, Moon, planets, and a few miscellaneous stars.

The observations from September 3, 1903, to September 30, 1908, which were made under the direction of Prof. W. S. EICHELBERGER, United States Navy, are given in the following pages, forming Volume IX, Part II, Publications of the United States Naval Observatory, Second Series; those from October 1, 1908, to April 11, 1911, which were made under the direction of Prof. F. B. LITTELL, United States Navy, will be given in Volume IX, Part III.

The reductions were all made under the direction of Professor EICHELBERGER, and the various steps of the routine reductions, as far as through the apparent right ascension and declination, are given with the observations.

The right ascensions, as given here, depend upon clock and azimuth stars whose positions were taken from NEWCOMB's Catalogue of Fundamental Stars.[3] In the derivation of the observed clock corrections, however, the following corrections are applied to NEWCOMB's right ascensions to allow for the effect of the screens used in observing:

	s
For stars whose magnitudes lie between 6.0 and 4.1	+0. 02
For stars whose magnitudes lie between 4.0 and 1.6	+0. 03
For stars whose magnitudes are brighter than 1.5	+0. 05

and in forming the adopted clock correction for the night, in order to eliminate the effect of the relative personal equations of the various observers, the observed corrections are first reduced to one of the observers adopted as a standard for one or more years at a time.

The zenith distances similarly are obtained from nadir observations and are reduced with the Pulkowa refraction tables as given in Publications of the United States Naval Observatory, Volume IV, Appendix II. The declinations are obtained by assuming the latitude of the transit circle to be $+38° 55' 14''.1$. No corrections have been applied for division error, flexure, or variation of latitude.

---

[1] Catalogue of 2,798 Zodiacal Stars for the Epoch 1900, arranged for differential observations of the planets.

[2] Astronomical Papers Prepared for the Use of the American Ephemeris and Nautical Almanac, Volume VIII, Part III.

[3] Astronomical Papers Prepared for the Use of the American Ephemeris and Nautical Almanac, Volume VIII, Part II.

In Volume IX, Part I, will be found a description of the instrument and accessories and of the methods of observation and reduction, the various instrumental investigations and discussions of the observations with the resulting corrections, the various reduction tables, and the definitive results both for the individual observations and in catalogue form.

EXPLANATION OF THE PRINTED OBSERVATIONS AND REDUCTIONS (PP. B 1–B 759).

The first column gives the number on the page for convenience of reference.

The second column gives the astronomical date, the designation of the observer, and the name of the object observed. The day is assumed to commence with the transit of the Sun. Where an assistant was employed throughout the observer's tour his designation is given with that of the observer. The observers are designated as follows:

Bs. =B. Boss.
Br. =W. M. Brown.
Ei. =W. S. Eichelberger.
Fk. =C. W. Frederick.
Hl. =A. Hall.
L. =F. B. Littell.
M. =H. R. Morgan.
P. =J. Pawling.
R. =H. L. Rice.
S. =A. N. Skinner.
T. =A. B. Turner.
Y. =E. I. Yowell.

The names of the stars contained in Newcomb's Suggested List of Fundamental Stars are taken from that list except when only the constellation name is given there; in that case the catalogue name and number suggested by Newcomb in the column "Remarks" is used. For the other stars the Bonner Durchmusterung numbers are used as far as they are available, and the numbers of the Cape Photographic Durchmusterung for the remainder.

The third column gives the number of threads over which transits were taken.

The fourth column gives the mean of the times of transit over the threads observed reduced to mean thread, the hour being omitted. From September 3 to October 2, 1903, the standard mean thread was the mean of the seven threads b_1, b_3, b_4, b_5, b_6, b_7, and b_9, and for the remaining period the mean of the nine threads b_1 to b_9. In connection with the unsymmetrical observations of the Sun, Moon, and planets, the correction for motion is included.

The fifth column gives the value of $m+n \tan \delta+c \sec \delta$ in Bessel's formula for reducing transit observations. In the case of the Moon this column includes also the correction for the motion of the Moon while passing from the mean thread to the true meridian.

The sixth column gives the clock correction. Those corrections printed in heavy-face type are the observed corrections, and the remaining ones are the adopted corrections used in reducing the right ascensions. Quantities inclosed in brackets were not used in deriving the adopted clock correction.

From September 3, 1903, to April 23, 1908, the quantities in the fifth and sixth columns are affected by corrections for irregularity of pivots, see Part I. In consideration of the results of subsequent and more extended pivot investigation, however, these corrections have been eliminated from the collected results as published in Part I.

The seventh column gives the circle reading, the seconds being the mean of the readings of the four microscopes, except in the comparatively few cases indicated by notes when it gives either the mean of two opposite microscopes or the mean of two independent readings of the four.

The eighth column gives the mean of the readings of the zenith distance micrometer for the bisections made at Threads II and VI, unless otherwise specified at the bottom of the page.

The ninth column gives the zenith point correction obtained from the nadir observations as explained in the Introduction to Volume IX, Part I.

The tenth column gives the correction for refraction computed from the Pulkowa refraction tables.

The eleventh column gives the apparent right ascension, i. e., the sum of the quantities in the fourth, fifth, and sixth columns, substituting in the sixth column the adopted clock correction where an observed one is given.

The twelfth column gives, for the Sun, Moon, and planets where the center was not observed, the correction necessary to reduce the observed apparent right ascension to the apparent right ascension of the center and, for each non-ephemeris star, the correction necessary to reduce the apparent right ascension to the mean right ascension for the beginning of the year.

The thirteenth column gives the apparent declination, derived by combining the assumed latitude with the following six quantities: the three contained in the seventh, ninth, and tenth columns, that in the eighth transferred into arc, the reduction to meridian, and the correction for inclination and distance of the zenith distance threads. In connection with the unsymmetrical observations of the Sun, Moon, and planets the correction for motion is included.

The fourteenth column gives, for each non-ephemeris star, the correction necessary to reduce the apparent declination to the mean declination for the beginning of the year.

At the bottom of each page, in the left-hand corner, are found the meteorological data; in the right-hand corner, the details of the correction in declination for parallax, semidiameter, and defective illumination for the observations of the Sun, Moon, and planets to reduce the observed apparent declination to the apparent geocentric declination of the center; and in the center of the page, various notes referred to the proper star by the reference number.

Micrometer bisections are made at II, VI, except as noted below.

3, 8.	Bisections at I, II.
16, 20, 23, 29, 50.	Bisections at VI, VII.
18.	Bisections at II, VII.
25.	Bisections at II, VI, VII.
28.	Bisections at I, II, III.
30, 31.	Bisections at I, II, VI, VIII.
38.	Bisections at III, V.
39, 47.	Bisection at II.
40.	Bisection at V.
42.	Bisection at VI.
43.	Bisections at b_3, b_7.

Notes.

1–12.	Images occasionally diffuse and unsteady.
8.	Revolutions of micrometer reading assumed.
16.	Degrees and minutes of circle reading assumed.
32–43.	Clouds; seeing bad.
35.	Circle reading increased 2′.
39.	Circle reading decreased 1′.
44.	Circle reading decreased 2′.
44-54.	Images diffuse.

Micrometer bisections are made at II, VI, except as noted below.

23. Bisections at I, II, III.
24. Bisection at VII.
25. Bisections at II, VII.
34. Bisections at I, II.
46. Bisection at II.
52. Bisection at I.
56. Bisections at I, II, VI, VII.
56. Z. D. threads A used.
57. Bisections at VI, VII.

Notes.

1-46. Clouds: images unsteady at beginning of work.
32. Micrometer reading of one bisection decreased 0.1 rev.
34. Micrometer reading increased 1 rev.

37.	Bisection at VI.
48.	Bisection at II.
51.	Bisections at II, VII.

Notes.

1, 2, 3.	Degrees and minutes of circle reading assumed.
8.	Circle reading increased 20′.
25.	Faint and unsteady.
38.	Circle reading increased 30′.
43.	Assumed that south star was observed as directed on the observing list.
43, 44.	Micrometer reading increased 5 rev.
46–53.	Clouds.

Micrometer bisections are made at II, VI, except as noted below.

1, 22, 26.	Bisections at VI, VII.
4.	Bisections at I, II, III.
5.	Bisections at V, VI, VII.
6.	Bisections at I, II, VI, VII.
7.	Bisections at II, VI, VII.
11.	Bisections at III, VI.
12, 44.	Bisections at I, II.
18, 24.	Bisections at III, V.
25.	Bisections at b_5, b_7, b_9.
28.	Bisections at b_3, b_5, b_7.

Notes.

1-3.	Clouds.
9.	Circle reading increased 30′.
23.	Assumed that south star was observed as directed on observing list.
24, 28.	Poor.
33.	Faint; two microscopes used.

Micrometer bisections are made at II, VI, except as noted below.

5.	Bisections at II, VII.
13, 27, 31, 33, 54.	Bisections at I, II.
23.	Bisections at IV, V.
24.	Bisections at II, III, IV, V, VI.
29.	Bisections at III, V.
44, 53.	Bisection at VI.
48.	Bisections at III, VI.
50.	Bisections at I, II, II.
51.	Bisections at V, VI, VII.

Notes.

28. Two microscopes used.

41–49. Clouds and haze.

Micrometer bisections are made at II, VI, except as noted below.

2, 13, 14, 29. Bisections at I, II, VI, VII.
10, 36, 46. Bisections at III, V.
11. Bisections at II, III, IV, V, VI.
20, 33. Bisections at b_3, b_5, b_7.
23, 31, 49. Bisections at VI, VII.
27. Bisections at I, II, III.
28. Bisections at V, VI, VII.
38. Bisection at V.
40. Bisections at III, IV, V.

Notes.

1, 2, 13, 14. Unsteady.
36. Circle reading increased 10′.
39. Assumed that south star was observed as directed on observing list.

Micrometer bisections are made at II, VI, except as noted below.

6, 7, 12, 16, 17, 20, 26, 29.	Bisections at VI, VII.
8.	Bisections at II, VII.
9.	Bisection at VI.
11.	Bisections at I, II, III.
13, 23.	Bisections at I, II.
18.	Bisections at b_4, b_6.
19.	Bisections at b_2, b_4, b_5, b_6, b_8.
25.	Bisections at I, VII.

Notes.

1.	Two microscopes used.
1, 6, 7, 8.	Through clouds.
18.	Poor.
28.	Circle reading increased 40′.
37, 46.	Unsteady.

Micrometer bisections are made at II, VI, except as noted below.

1, 32, 44.	Bisections at VI, VII.
2, 3, 4, 6, 9, 11, 12, 13, 17, 18, 25, 26, 48–51, 53, 54.	Bisections at I, II, VI.
5, 7, 10, 14, 15, 16, 19, 21–24, 27–31, 33–43, 45, 46, 47, 52, 55–61.	Bisections at I, II, VI, VII.
8.	Bisections at II, VI, VII.
20.	Bisections at I, II, VII.

Notes.

1–61 Unsteady; poor definition; conditions slowly improving.

56. Faint.

Micrometer bisections are made at II, VI, except as noted below.

3. Bisection at VI.
16, 34, 45. Bisections at VI, VII.
22, 28, 33, 39. Bisections at I, II.
48. Bisections at I, II, III.
49. Bisections at V, VI, VII.
50. Bisections at I, II, VI, VII.
51. Bisections at III, V.
53, 54. Bisections at b_1, b_3, b_5, b_7, b_9.

Notes.

40. Very faint and hazy.
42. Circle reading increased 30′.
45. Bisections poor.

Micrometer bisections are made at II, VI, except as noted below.

8, 21. Bisections at I, II.
9. Bisections at II, VI, VII.
10. Bisections at I, II, III.
11. Bisections at V, VI, VII.
13. Bisections at III, IV, V.
18, 40. Bisections at I, II, VI, VII.
22. Bisections at III, V.
30. Bisections at II, III, V, VI.

Notes.

1–9. Conditions poor.
18, 30, 40. Unsteady.
30, 38. Diffuse.
37. Circle reading decreased 1°.
42–52. Images woolly and unsteady.

Micrometer bisections are made at II, VI, except as noted below.

2, 6, 34. Bisections at II, VII.
37. Bisections at III, V.
39, 42, 55. Bisections at I, II.
44, 51. Bisections at II, III, V, VI.
46. Bisections at III, VI.
49. Bisection at V.
50, 56, 58. Bisections at I, II, VI, VII.
53. Bisections at VI, VII.

Notes.

10. Micrometer reading increased 10 rev.
43, 49. Clouds.
44. Unsteady.
51. Very unsteady; clouds.
56. Through clouds.

Micrometer bisections are made at II, VI, except as noted below.

7. Bisections at I, II, III.
8. Bisections at V, VI, VII.
9. Bisections at II, III, IV, V, VI.
13, 17, 47. Bisections at b_3, b_5, b_7.
15, 16, 32, 34. Bisections at I, II.
24, 43, 50. Bisections at II, III, V, VI.
31. Bisection at II.
38. Bisections at V, VI.
39. Bisections at VI, VII.
40. Bisections at II, VI, VII.
41. Bisections at I, II, VI.
49. Bisections at I, II, VI, VII.

Notes.

4, 5, 30. Through clouds.
11. Assumed that mean was observed.
24. Very unsteady.
35. Very faint.
38–51. Images diffuse and unsteady.
41. Micrometer reading increased 1 rev.
44. Observed head north.

Micrometer bisections are made at II, VI, except as noted below.

24, 50.	Bisections at I, II.
32.	Bisections at III, V.
38, 45, 56.	Bisections at III, IV, V.
42.	Bisections at b_4, b_5, b_6.
44, 52, 54.	Bisections at I, II, VI.

Notes.

28.	Micrometer reading increased 10 rev.
38, 42, 45.	Unsteady.
56.	Very faint; poor.

Micrometer bisections are made at II, VI, except as noted below.

2, 48, 54. Bisections at VI, VII.
3, 9. Bisections at III, V.
4. Bisections at b_4, b_5, b_6.
8. Bisection at I.
13. Bisections at IV, V.
32, 34. Bisections at II, VII.

Notes.

6. Faint; unsteady.
21, 22. Images unsteady.

Micrometer bisections are made at II, VI, except as noted below.

1. Bisections at I, II, III.
2. Bisections at V, VI, VII.
5. Bisections at I, II, VI, VII.
6. Bisections at I, II.
9. Bisections at II, III, V, VI.
14. Bisections at b_3, b_5, b_7.
18. Bisections at I, VI, VII.
24, 26. Bisections at I, II, VI.

Notes.

13. Observed head north.
18. Diffuse.
51-59. Unsteady.

Micrometer bisections are made at II, VI, except as noted below.

7, 8, 18, 24, 42, 45. Bisections at I, II.
9, 10, 13, 26, 46, 51, 54–56. Bisections at VI, VII.
28. Bisections at II, VII.
48. Bisections at b_5, b_6, b_8, b_9.
50. Bisections at b_4, b_5, b_6.

Notes.

31. Circle reading decreased 1′
47, 55. Unsteady.
47–61. Conditions poor.
52. Thin clouds.
53. Circle reading decreased 2′.

Micrometer bisections are made at II, VI, except as noted below.

22, 32, 54. Bisections at VI, VII.
27. Bisections at II, VII.
41. Bisections at I, II.
44, 47, 52. Bisections at III, IV, V.
45. Bisections at b_4, b_5, b_6, b_8.
48, 60. Bisections at II, VI, VII.
56. Bisections at II, III, IV.

Notes.

1. Ill defined and hazy.
1–60. Conditions rather poor.
31. Two microscopes used.
48, 50, 52, 58, 60. Unsteady.

Micrometer bisections are made at II, VI, except as noted below.

1, 7, 23, 32, 38, 42. Bisections at VI, VII.
19. Bisections at I, II, III.
20. Bisections at V, VI, VII.
29, 37. Bisections at b_4, b_5, b_6.

Notes.

15, 24, 25. Very diffuse.
22. Revolutions of micrometic reading assumed.
29. Diffuse and unsteady.

Micrometer bisections are made at II, VI, except as noted below.

3, 30, 46.	Bisections at VI, VII.
10, 26, 33.	Bisections at I, II.
16, 51, 54, 56, 57.	Bisections at II, VII.
43.	Bisection at II.
62.	Bisections at II, III, IV, V, VI.

Notes.

27. Degrees and minutes of circle reading assumed.
53. Micrometer reading decreased 1 rev.

Micrometer bisections are made at II, VI, except as noted below.

1, 18, 28, 36, 45, 48. Bisections at b_4, b_5, b_6.
3. Bisections at b_4, b_6.
7, 10, 15, 20, 23, 31. Bisections at III, IV, V.
9. Bisections at b_5, b_6, b_7.
25, 42, 51. Bisections at I, II, VI, VII.
26. Bisections at I, II, III.
27. Bisections at V, VI, VII.
29, 35, 44, 47. Bisections at I, II.
30. Bisections at II, III, IV, V, VI.
33, 38. Bisections at VI, VII.
40. Bisections at b_4, b_5.

Notes.

1–24. Conditions poor.
3. Unsteady.
20. Very unsteady and woolly.
43. Micrometer reading decreased 3 rev.

Micrometer bisections are made at II, VI, except as noted below.

5. Bisections at b_3, b_4, b_6, b_7, b_8.
11. Bisections at III, IV, V.
15. Bisections at I, II, VI, VII.
16. Bisections at I, II, III.
17, 47. Bisections at VI, VII.
18. Bisections at b_1, b_3, b_5, b_6.
26. Bisections at I, II.
36, 39, 49, 52. Bisections at II, VII.

Notes.

1–14. Woolly.
3. Faint and unsteady.
4, 5, 6, 9. Unsteady.
6. Micrometer reading increased 5 rev.
16. Micrometer reading decreased 1 rev.
33–35. Clouds.

Micrometer bisections are made at II, VI, except as noted below.

19, 51, 53. Bisections at I, II.
36. Bisections at I, II, VI, VII.
37. Bisections at I, II, III.
38. Bisections at V, VI, VII.
49. Bisections at II, VII.
50. Bisections at II, III, IV, V, VI.

Notes.

4. Micrometer reading decreased 1 rev.
12. Mean of close double observed.
19. Woolly.
20–35. Conditions rather poor.
24. One microscope reading increased 10″.
39. Assumed that brighter was observed.

Micrometer bisections are made at II, VI, except as noted below.

1, 33, 35.	Bisections at I, II.
3.	Bisections at III, IV, V.
5, 28, 29, 44.	Bisections at VI, VII.
10.	Bisections at I, II, III.
11.	Bisections at V, VI, VII.

Notes.

2. Woolly: very poor.

3–9. Conditions very bad; high wind.

Micrometer bisections are made at II, VI, except as noted below.

2. Bisections at I, II.
13. Bisections at II, VII.
37. Bisections at b_4, b_5, b_6.
40 Bisections at VI, VII.

Notes.

37. Very diffuse and unsteady; poor.
41–43. Images poor and unsteady.
47–49. Unsteady.
51. Image poor.

Micrometer bisections are made at II, VI, except as noted below.

2, 3, 19. Bisections at III, V.
7. Bisections at III, IV, V.
8. Bisections at b_1, b_5, b_6.
12. Bisections at II, III, IV, V, VI.
13, 21. Bisections at I, II, VI, VII.
14, 31, 40. Bisections at I, II.
15, 22, 46, 48. Bisections at VI, VII.

Notes.

10. Micrometer reading increased 5 rev.
13–28. Clouds.
21. Very faint.
52. Revolutions of micrometer reading assumed.

Micrometer bisections are made at II, VI, except as noted below.

7, 32, 33, 44, 49, 55, 56, 62. Bisections at I, II.
8, 19, 20, 24, 40, 51, 53, 54. Bisections at VI, VII.
23. Bisections at II, VII.
39. Bisections at I, II, VI.

Notes.

1–63. Conditions variable.
8. Assumed that north star was observed.
18, 24. Clouds.
25. Faint at times.
51, 59, 61. Circle reading decreased 2′.

Micrometer bisections are made at II, VI, except as noted below.

3, 19, 26, 29, 35.	Bisections at III, V.
4, 17.	Bisections at III, IV, V.
16, 21, 23–25, 27, 31, 32, 36–42.	Bisections at I, II, VI, VII.
28.	Bisections at II, III, V, VI.
34, 44.	Bisections at VI, VII.
43, 46.	Bisections at I, II.
49.	Bisections at II, VII.

Notes.

4-11. Clouds.

32. Hazy.

Micrometer bisections are made at II, VI, except as noted below.

1, 23.	Bisections at II, III, IV, V, VI.
6, 13.	Bisections at III, V.
8, 12, 25, 27, 33, 37, 45, 51, 54, 57.	Bisections at I, II.
16.	Bisections at V, VI.
22, 34, 52, 55, 58.	Bisections at VI, VII.

Notes.

1–3.	Clouds.
5.	Woolly.
22–45.	Images poor; unsteady.
44.	One microscope reading decreased 10″.
46–59.	Slightly unsteady.

Micrometer bisections are made at II, VI, except as noted below.

1, 15, 44, 57.	Bisections at VI, VII.
3, 42.	Bisections at I, II.
5.	Bisections at II, III, IV, V, VI.
7, 8, 14.	Bisections at III, V.
24, 28, 31, 38, 48, 50, 51, 56.	Bisections at II, VII.

Notes.

1–4.	Conditions very poor.
5.	Micrometer reading decreased 1 rev.
11, 13, 16–18.	Clouds.
14.	Very poor; haze.

Micrometer bisections are made at II, VI, except as noted below.

5, 7, 40, 43. Bisections at II, VII.
13, 22, 27. Bisections at III, IV, V.
18, 31. Bisections at I, II.
19, 24, 32. Bisections at VI, VII.
23, 25, 26. Bisections at III, V.
28, 30. Bisections at I, II, VI, VII.

Notes.

22. Micrometer reading decreased 1 rev.
28, 41, 42, 51–53. Unsteady.
31. Micrometer reading increased 1 rev.
33. Clouds.
44. One microscope reading decreased 10″.
47. Diffuse.

Micrometer bisections are made at II, VI, except as noted below.

4.	Bisections at II, VII.
8, 28. 34.	Bisections at I, II.
12, 15, 16, 21, 29, 32, 39.	Bisections at VI, VII.
17. 24.	Bisections at II, VI, VII.
18	Bisections at III. V.
23.	Bisections at IV, V.
26.	Bisections at I, II, VI, VII.
30.	Bisections at II, III, IV, V. VI.

Notes.

15. Very diffuse.

16–25. Conditions very poor.

32. Circle reading decreased 12′.

Micrometer bisections are made at II, VI, except as noted below.

5. Bisections at II, III, IV, V, VI.
13, 17, 53. Bisections at I, II.
14. Bisections at VI, VII.
38, 54, 55. Bisections at II, VII.

Notes.

1, 10, 11, 55. Clouds.
4, 12, 15–58. Unsteady; poor at times.

Micrometer bisections are made at II, VI, except as noted below.

1.	Bisections at I, II, VI, VII.
3, 32, 45, 46, 52.	Bisections at I, II.
4, 11.	Bisections at VI, VII.
14, 19, 33, 34.	Bisections at II, VII.
54.	Bisections at II, III, IV, V, VI.

Micrometer bisections are made at II, VI, except as noted below.

2, 29, 47.	Bisections at I, II.
11, 12, 17.	Bisections at II, III, IV, V, VI.
13.	Bisections at I, II, VI, VII.
20, 33, 34, 39.	Bisections at II, VII.
24, 25.	Bisections at II, VI, VII.
36.	Bisections at VI, VII.

Notes.

1–11.	Conditions very poor.
14–16, 31, 41.	Clouds.
36.	Very faint.
45–49.	Images unsteady.

Micrometer bisections are made at II, VI, except as noted below.

5, 41. Bisections at I, II.
6, 53. Bisections at VI, VII.
7, 8, 13, 21, 24, 26, 28, 33, 47, 51, 52, 62. } Bisections at II, VII.

Notes.

5-10. Stars approximately a magnitude too faint.
10. Elongated.

Micrometer bisections are made at II, VI, except as noted below.

5, 11, 14.	Bisections at II, VII.
20, 22, 34.	Bisections at I, II.
23, 31, 33, 35.	Bisections at VI, VII.
30.	Bisections at III, V.
45.	Bisections at I, II, VI, VII.

Notes.

32.	Clouds.
42.	Micrometer reading increased 1 rev.
48–51.	Conditions very poor.

Micrometer bisections are made at II, VI, except as noted below.

2, 30, 31, 33. Bisections at VI, VII.
6, 7. Bisections at III, IV, V.
8. Bisections at II, III, IV, V, VI.
15. Z. D. threads C used.
15, 32, 41. Bisections at I, II, VI, VII.
21. Bisection at VI.
23, 29, 46. Bisections at I, II.
37, 38, 44. Bisections at II, VII.

Notes.

1. Circle reading decreased 2°.
14. Two microscopes used.
17. Circle reading decreased 1′.
37. Image poor and unsteady.
41. Very difficult.
41–49. Haze.

Micrometer bisections are made at II, VI, except as noted below.

1.	Bisections at b_2, b_3, b_5, b_7, b_8.
2, 16, 18, 29, 38, 41.	Bisections at I, II.
3, 22, 32.	Bisections at VI, VII.
4, 11.	Bisections at I, II, VI, VII.
21, 26, 42, 50.	Bisections at II, VII.

Notes.

1.	Clouds; faint at times.
18–24.	Conditions very poor.
35, 40–46, 51.	Image poor.

Micrometer bisections are made at II, VI, except as noted below.

2, 16, 20, 33.	Bisections at II, VII.
11, 35, 37, 39, 44; 52.	Bisections at VI, VII.
24.	Bisection at II.
34, 36.	Bisections at I, II.
38, 47.	Bisections at I, II, VI, VII.
49.	Bisections at b_1, b_2, b_5, b_8, b_9.

Notes.

16. Rather difficult.
44. Clouds.
49. Microscopes read at beginning and end of observation.

Micrometer bisections are made at II, VI, except as noted below.

2, 27, 47, 55.	Bisections at VI, VII.
3.	Bisections at b_1, b_2, b_5, b_8, b_9.
7.	Bisection at II.
13, 15, 46.	Bisections at I, II.
28, 37.	Bisections at II, VII.

Notes.

3.	Microscopes read at beginning and end of observation.
3.	Micrometer reading increased 1 rev.
7.	Image poor; very unsteady.
9.	Difficult.
10-18.	Conditions poor.
56.	Unsteady.

Micrometer bisections are made at II, VI, except as noted below.

6. Bisections at b_2, b_8.
7. Bisections at III, IV, V.
12, 14, 15, 28. Bisections at III, V.
17, 43. Bisections at I, II.
18, 25. Bisections at VI, VII.
24. Bisections at I, II, VI, VII.
46, 47. Bisections at II, VII.

Notes.

21. Unsteady.
23. Micrometer reading increased 10 rev.
26. Micrometer reading decreased 1 rev.

Micrometer bisections are made at II, VI, except as noted below.

4.	Bisections at b_2, b_5, b_8.
8, 14, 19, 49, 53.	Bisections at VI, VII.
9.	Bisections at b_3, b_5, b_7.
11, 25.	Bisections at III, V.
13, 38, 48.	Bisections at I, II.
21.	Bisections at I, II, VI, VII.
35, 46, 54.	Bisections at II, VII.

Notes.

1–12. Unsteady at times.

4. Revolutions of micrometer reading assumed.

Notes.

8. Micrometer reading decreased 3 rev.
12–28. Conditions poor.
35. Micrometer reading decreased 1 rev.
41–49. These observations were made and reduced like those published in Volume II and the results have been included with those of that volume in forming the Washington A. G. Catalogue. The adopted equator point is + 38° 55′ 16″.4.
42. Circle reading increased 8′.

Micrometer bisections are made at II, VI, except as noted below.

1. Bisections at I, II, VI.
3, 6, 7, 9–11, 28. Bisections at I, II, VI, VII.
4, 13, 19, 34, 45. Bisections at VI, VII.
5, 8. Bisection at I.
12. Bisections at II, III, IV, V, VI.
17. Bisections at I, II.
20. Bisections at b_1, b_3, b_5, b_7.
25. Bisections at b_1, b_3, b_5, b_7, b_9.
26. Bisection at II.
28. Z. D. threads A used.
32, 37, 43. Bisections at III, IV, V.

Notes.

3–11. These observations were made and reduced like those published in Volume II and the results have been included with those of that volume in forming the Washington A. G. Catalogue. The adopted equator point is +38° 55′ 16″. 2.

25. Right ascension observed chronographically.

27. Circle reading decreased 10′.

Micrometer bisections are made at II, VI, except as noted below.

1, 38, 47.	Bisections at b_1, b_2, b_5, b_8, b_9.
5, 35, 46, 50.	Bisections at III, V.
8.	Bisections at b_1, b_2, b_5, b_8.
13, 30, 33.	Bisections at I, II, VI, VII.
14, 15, 17, 27, 32.	Bisections at VI, VII.
18.	Bisections at b_4, b_5, b_6.
29.	Bisections at II, III, IV, V, VI.
31.	Bisections at I, II.
43.	Bisections at II, VI, VII.

Notes.

1. Microscopes read in middle and at end of observation.
27. Micrometer reading increased 1 rev.
50. Circle reading increased 2′.

Micrometer bisections are made at II, VI, except as noted below.

10, 12, 17, 28, 48. Bisections at VI, VII.
14. Bisections at II, VII.
16, 23. Bisections at b_3, b_4, b_5, b_6, b_7.
21, 27, 47. Bisections at I, II.
26. Bisections at I, II, VI, VII.
30. Bisections at II, III, IV, V, VI.
40. Bisections at II, VI, VII.

Notes.

11. Assumed that brighter was observed.
17, 20. Micrometer reading decreased 1 rev.
31–52. Images frequently poor; unsteady.

24, 27.	Bisections at I, II, VI, VII.
32.	Bisections at II, III, IV, V, VI.

Notes.

11.	Assumed that brighter was observed.
11–23.	Conditions poor.
15, 22, 23.	Diffuse and very unsteady.
31–47.	Images poor; unsteady.

Micrometer bisections are made at II, VI, except as noted below.

1, 16, 41.	Bisections at I, II.
2, 18, 42.	Bisections at VI, VII.
3, 23, 43.	Bisections at I, II, VI, VII.
7, 20.	Bisections at III, IV, V.
8–10, 13, 17, 26, 31, 48.	Bisections at III, V.
14.	Bisections at b$_2$, b$_5$, b$_8$.
23.	Z. D. threads A used.
25.	Bisections at II, III, IV, V, VI.
38.	Bisections at b$_4$, b$_6$.
39.	Bisections at IV, V.

Notes.

21, 38.	Revolutions of micrometer reading assumed.
35.	Degrees and minutes of circle reading assumed.

Micrometer bisections are made at II, VI, except as noted below.

2, 4, 30, 37, 39, 44, 46, 47. Bisections at III, V.
12. Bisections at b_1, b_2, b_5, b_8, b_9.
13. Bisections at II, III, IV, V, VI.
14, 27, 51. Bisections at I, II, VI, VII.
33. Bisections at b_4, b_5, b_6.
35. Bisection at VI.
42, 49. Bisections at I, II.
50. Bisections at VI, VII.

Notes.

1–7. Images generally diffuse and unsteady.
8–29. Conditions poor.
30–48. Unsteady.
41, 48. Revolutions of micrometer reading assumed.

Micrometer bisections are made at II, VI, except as noted below.

1, 30, 31, 43. Bisections at I, II, VI, VII.
4, 45. Bisections at II, III, IV, V, VI.
5, 19, 29, 35, 49. Bisections at VI, VII.
10, 15, 16, 22, 25. Bisections at III, V.
12, 17, 28. Bisections at I, II.
24. Bisections at b_3, b_7.
48. Bisections at II, IV, V.

Notes.

19, 20. Revolutions of micrometer reading assumed.
20. Woolly.
21. Clouds.
48. Very poor.
